

# Specialty medical benefit drug list

Each specialty medical benefit drug below is categorized according to its most commonly recognized therapeutic indication or treatment class. Some drugs can be used for indications other than those that are listed below.

Drugs that are not included in the list either may not be considered specialty drugs or may be eligible for coverage under the member's prescription drug benefit. Drugs eligible for coverage under the prescription drug benefit are typically drugs that members can administer to themselves (e.g., oral agents, topical agents, self-injectable drugs). Biosimilars to any reference products on this list are considered specialty drugs after they have been approved by the U.S. Food and Drug Administration.

This list is subject to change without notice. For additional information about Independence Blue Cross Specialty Medical Benefit Drugs, please call the number on the back of your member ID card.

Specialty drugs
