

Reduce your medication costs

Find all the information you need in one place

Where you get your medications, and what formulary tier they're on, can greatly affect their price. Understand how to reduce your out-of-pocket medication costs and see how much you will spend.

The Independence Blue Cross *Pharmacy Finder* makes all this easy! To access this tool, go to ibxmedicare.com > [Get Care](#) > [Find a drug](#) or visit ibxmedicare.com/pharmacyfinder.

Find a network pharmacy tool

- Choose your search criteria (like distance from your home) and enter the information.
- **Preferred pharmacies** are marked by a star and the word *Preferred*.
- Preferred pharmacies may offer lower cost-sharing (called preferred cost-sharing) on drugs on certain tiers on your formulary.

Pricing and coverage tool

- Enter your location and the name of the drug you're searching for.
- Search for drugs by name, cost-sharing tier, or therapeutic class.
- Compare drug prices to see if we cover less-expensive drugs that could treat the same condition.
- See how much a drug will cost at various pharmacy locations, and where you can get the best price.

To get started:

Visit ibxmedicare.com/pharmacyfinder.

Select the name of your health plan from the *Plan options* list.

Choose the tool that best fits your needs.

Prescription drug lookup tool

- Enter your location and the name of the drug you're searching for.
- This tool will tell you what tier the drug is on, highlight if it's not covered by your plan (non-formulary), and show if we restrict your coverage of the drug — like:
 - Step therapy (i.e., you must try another drug before we will cover the one you're searching for)
 - Prior authorization (i.e., you need approval from us before we will cover the drug)
 - Quantity limits (i.e., we restrict how many doses of the drug we will cover)
