

## Commercial Claim Payment Bulletin - Pharmacy Benefit

**Title:** Excluded Medications with No Significant Advantage Over Covered Alternatives

**Policy #:** Rx.04.7

***Application of pharmacy policy is determined by benefits and contracts. Benefits may vary based on product line, group, or contract. Some medications may be subject to precertification, age, quantity, or formulary restrictions (ie limits on non-preferred drugs). Individual member benefits must be verified.***

***This pharmacy policy document describes the status of pharmaceutical information and/or technology at the time the document was developed. Since that time, new information relating to drug efficacy, interactions, contraindications, dosage, administration routes, safety, or FDA approval may have changed. This Pharmacy Policy will be regularly updated as scientific and medical literature becomes available. This information may include new FDA-approved indications, withdrawals, or other FDA alerts. This type of information is relevant not only when considering whether this policy should be updated, but also when applying it to current requests for coverage.***

***Members are advised to use participating pharmacies in order to receive the highest level of benefits.***

### ▶ Intent:

The intent of this policy is to communicate medications that are excluded under the member's prescription drug benefit.

### ▶ Description:

Medical necessity is defined in the member's benefits book. Medications that do not meet the definition of medical necessity are excluded from coverage under the prescription drug benefit.

Exclusion applies to the medication (chemical entity and formulation) as presented, regardless of brand or generic status available now or in the future.

### ▶ Policy:

Coverage is subject to the terms, conditions, and limitations of the member's contract.

The medications listed below do not meet medical necessity, as defined in the member's benefits book, and will be excluded from coverage (not covered) under the prescription drug benefit.

Drug	Components	Rationale
Duexis®	Ibuprofen 800mg/ famotidine 26.6mg tablet	Combination of ibuprofen and famotidine; no advantage over the individual components
